Frozen Planet II

This BBC series – narrated by Sir David Attenborough – explores the wildlife found in the world’s coldest regions: the Arctic and Antarctic, high mountains, frozen deserts, snowbound forests, and ice-cold oceans. From polar bears to penguins, and from snow monkeys to Siberian tigers, each species must overcome a unique set of challenges to endure its extreme environment. The screening will present one of six episodes of the series: Our Frozen Planet, which presents how frozen worlds have reached a tipping point – their future hangs in the balance and with it, so does ours.

19:15PM to 21:00PM

INTERACTIONS – When cinema looks to nature

Composed by 12 original short films, each shot during 2022, Interactions was released at the International Film Festival of Rome on 17 October 2022. The filmmakers participating in this film production have been selected carefully from all over the world, including Europe, Middle East, Africa, Asia, Latino America and USA, not only on the basis of their filmography, awards and fame, but as well for their particular sensitivity to themes regarding our planet, the consequences of the climate change on humankind, nature and the animal life.

INTERACTIONS is under the auspices of the UN Biodiversity Conference CBD COP15 (Montreal, Canada) and WAAS (World Academy of Art and Science); benefits of the support of its international donors such as the Global partner DDC (Swiss Direction of Development and Cooperation/Ministry of Foreign Affairs) together with the International Secretariat of Water (Canada); the Main Partner GAIL (India); the Partners such as Cariplo Foundation (Italy), SESC (São Paulo), Osklen and Instituto e (Rio de Janeiro), Voice Over Foundation (Milan), One Planet One Future (Milan), and Paul Schiller Stiftung, Zürich (Switzerland) among others.
